INTRODUCTION

Welcome to the guide of **The Meter app!**
If you haven't downloaded it yet, you can find it at **Google Play** or **Apple Store**, or by scanning the **QR code** here on the side

SCAN ME!

With the **app The Meter** you can acquire and manage all your measurements from the comfort of your smartphone or tablet: just connect your mobile device via bluetooth to your **CUBE^{PRO}** and use the features available from the various modes

In less than a minute you will have at your disposal a complete floor plan that allows you to save hours of project planning in the studio!

TheMeter  screen allows you to manage the connection to your device and access video tutorials, available on our YouTube channel

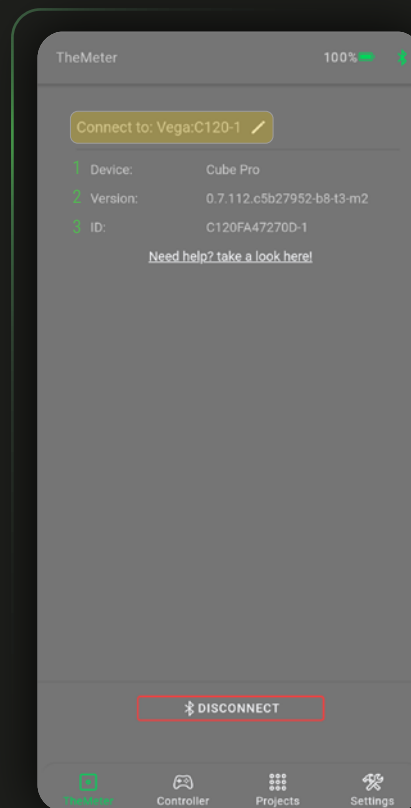

To connect your smartphone turn on the **CUBE PRO** holding down the button A  until the led turn green, then click  on the application

In case there is more than one **CUBE PRO** nearby the application will return you the list of devices it finds, giving you the possibility to choose which one you want to connect to.

To identify more precisely which device you are connecting to, you can use the function  which will make flash white the upper level led of the chosen **CUBE PRO** for 5 seconds. With  you can update the Bluetooth option

When you have completed connecting to the device you can see its name on the screen, editable by clicking on , and the details on Model¹, Firmware version² and serial number³

In case the connection fails due to several attempts, try restarting both devices.

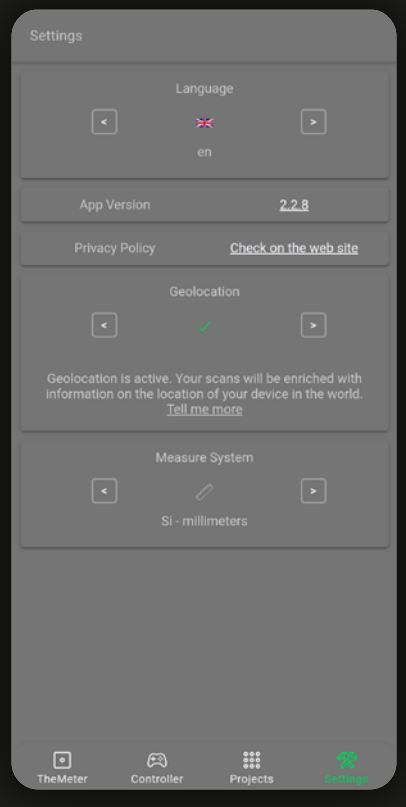

SETTINGS 

From the Settings  screen you have the possibility to change the language¹, access the page of the update summary of the app² and the page of the privacy policy³

1. Changing the language

3. Privacy Policy

5. Change units of measurement

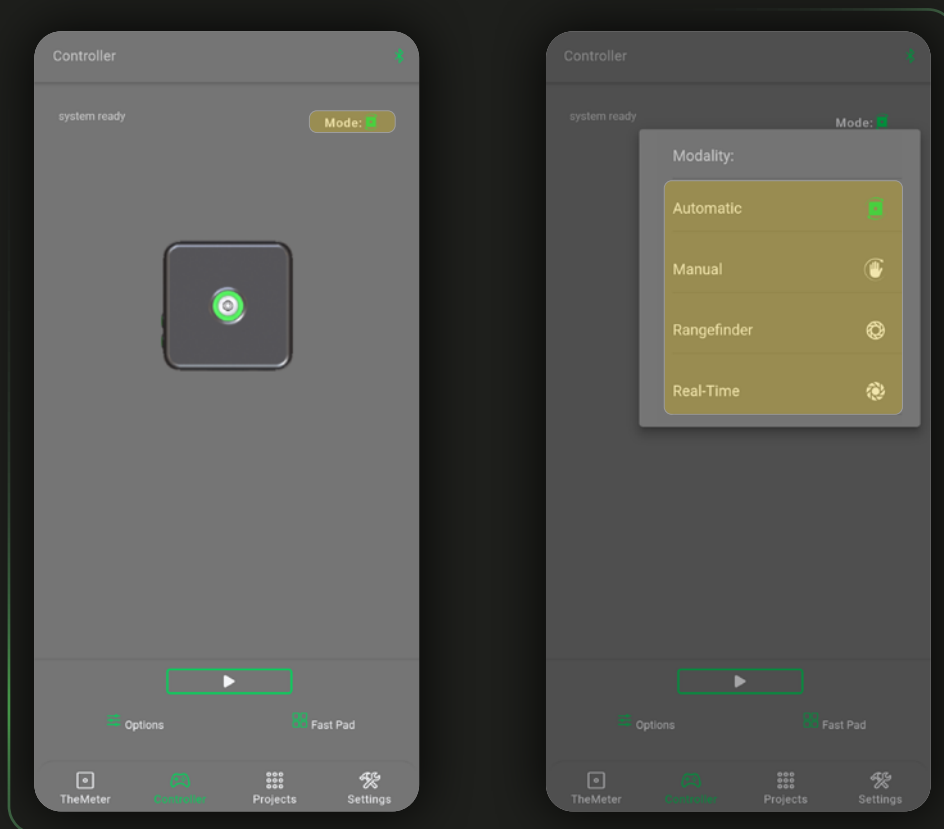

2. App version and link for details updates

4. On/Off geolocation

You can also turn on or off geolocation⁴ and change the unit of measurement⁵ between Millimeters and Inches

CONTROLLER 🎮

The Controller screen 🎮 allows you to use and manage the various operative modes of **CUBE^{PRO}**, selectable by clicking on **Mode:**

The button **Mode:** indicates the active mode; By default you will always be in the automatic mode

CONTROLLER

1. Automatic : For floor plans and sections. detected by the device automatically by returning a point cloud

2. Manual : you choose the points with which to create your own surveys

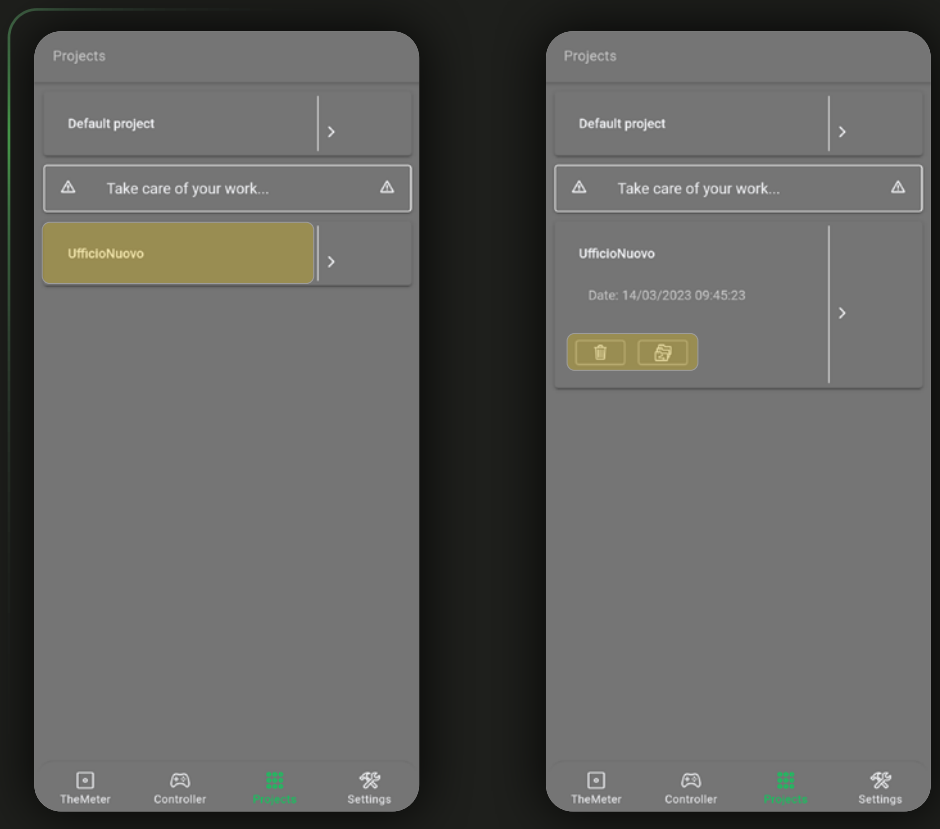

3. Rangefinder  and Real-Time : acquire any distance in single or continuous mode

In the Fast Pad  menu you can take advantage of additional features of the modes

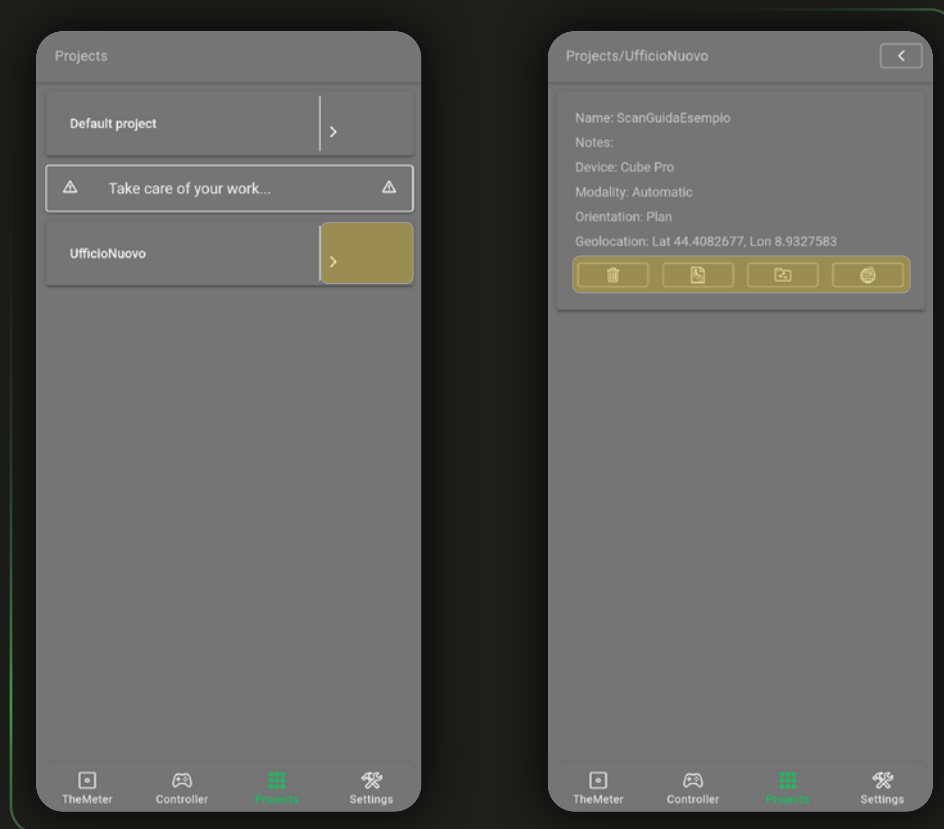

Via Options  you can edit the mode settings active at that moment

In Projects  screen you will find folders of all saved projects in the app's memory, containing your scans; "Default Project" is an example of a folder with files

By clicking on the name of the folder you can see information about the date and time of creation, and also you can delete it  or share it 

Clicking on the right button you can find the list of surveys, with the possibility to delete , review  or share  each files, and to know them geolocation by clicking on 

INTRODUCTION

Welcome to the guide of **The Meter Doctor app!**
If you haven't downloaded it yet, you can find it at **Google Play** or **Apple Store**, or by scanning the **QR code** here on the side

Google Play

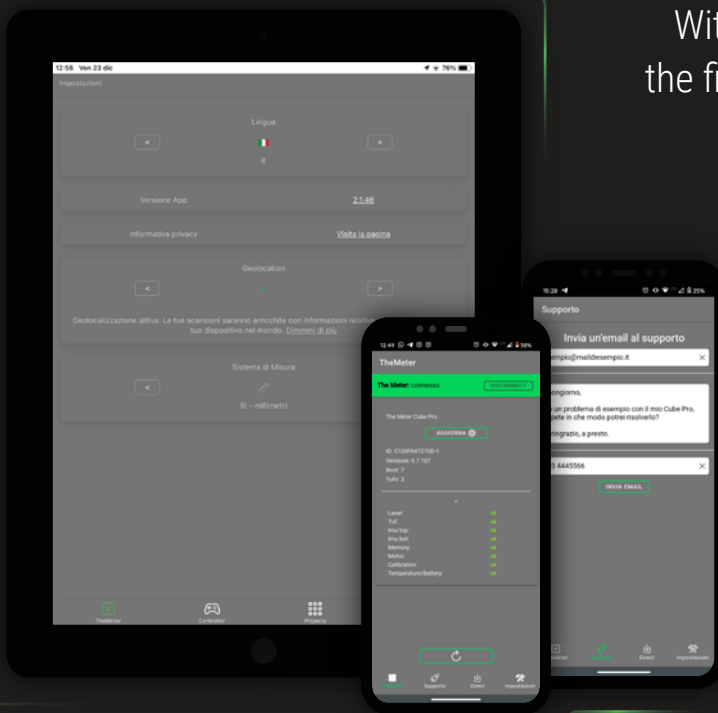

App Store

SCAN ME!

With the **app The Meter Doctor** you can update the firmware of your **CUBE^{PRO}**, know the operating status of its components and contact our team to ask technical support!

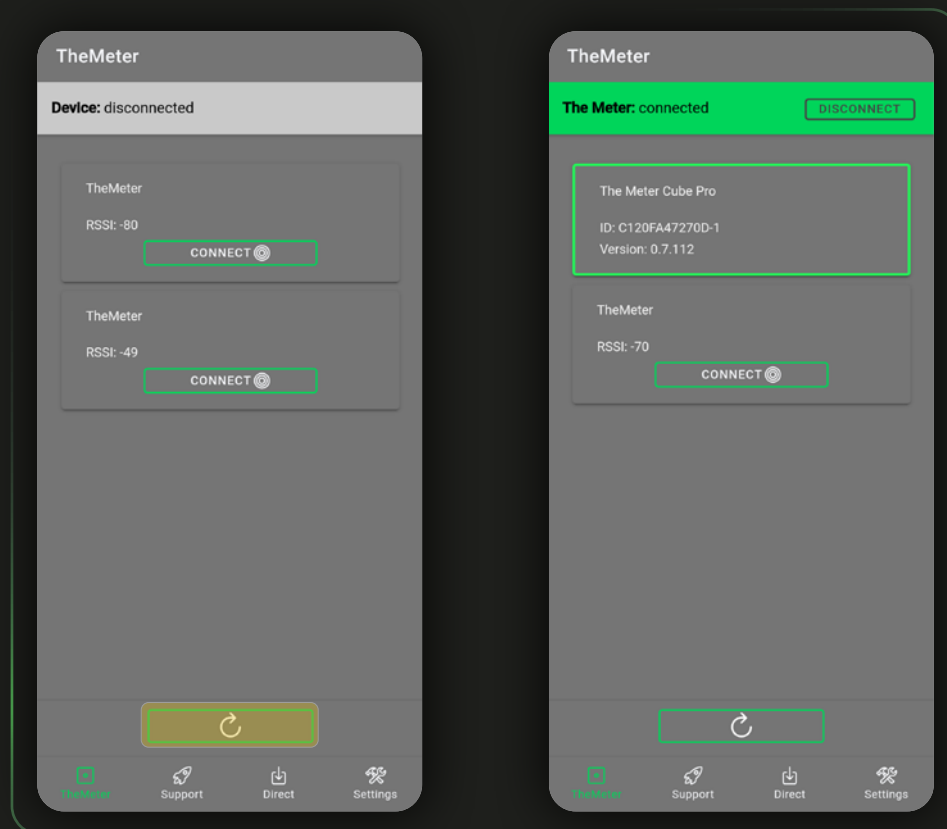

TheMeter  screen allows you to manage the connection to your device

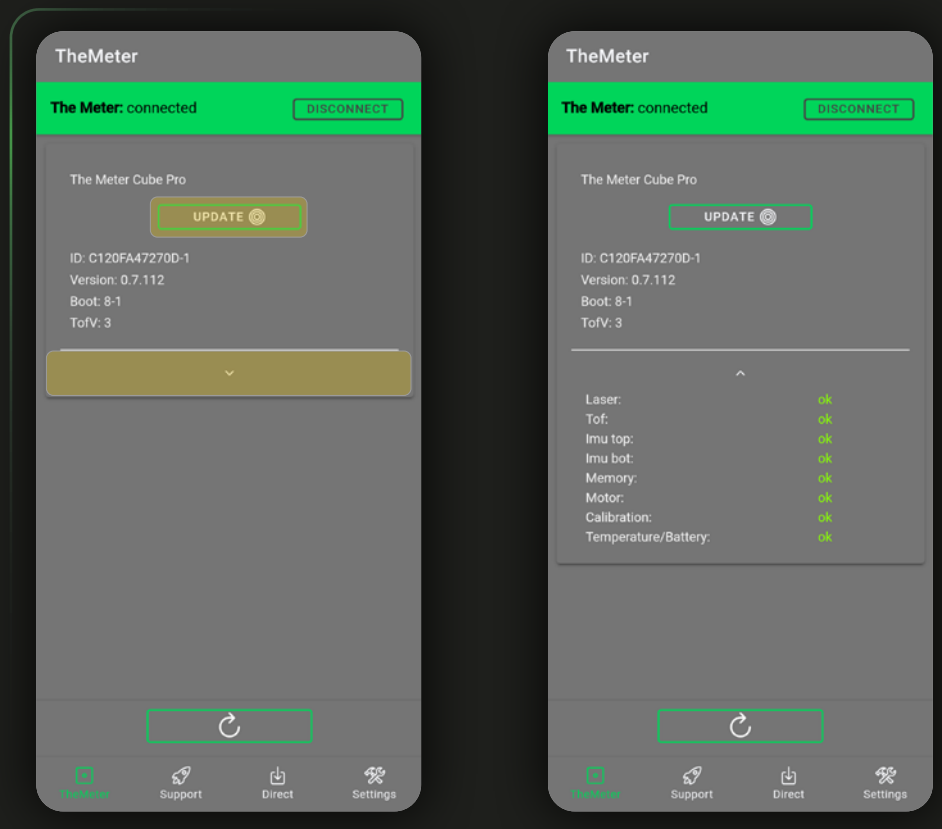

To connect your smartphone turn on the **CUBE PRO** holding down the button A  until the led turn green, then click  on the application

In case there is more than one **CUBE PRO** nearby the application will return you the list of devices it finds, giving you the possibility to choose which one you want to connect to.

With  you can update the Bluetooth research. If you run an update after connecting to one of the devices it will be highlighted

Once you have completed connecting to the device you can see on the screen its number of series, the firmware version, the Boot version, and the TOF firmware version; you can proceed with firmware updates by clicking on 

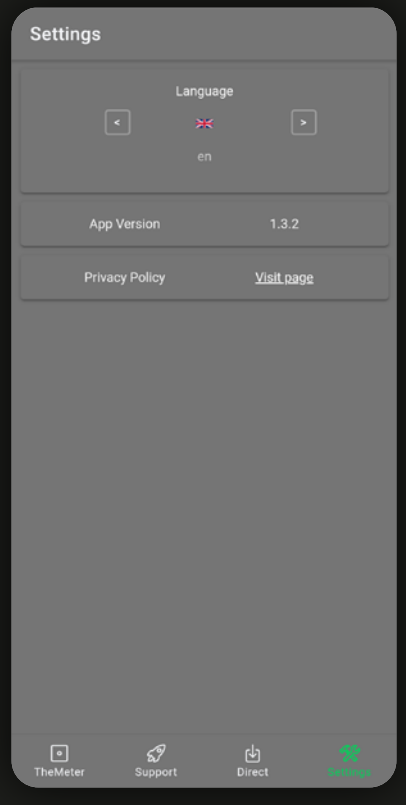

Clicking the button below the **CUBE PRO** details will show you the list of components, indicating active or failing status

From the Settings screen  we can change the language¹, view TheDoctor app version² and to that of the privacy policy³

1. Changing the language

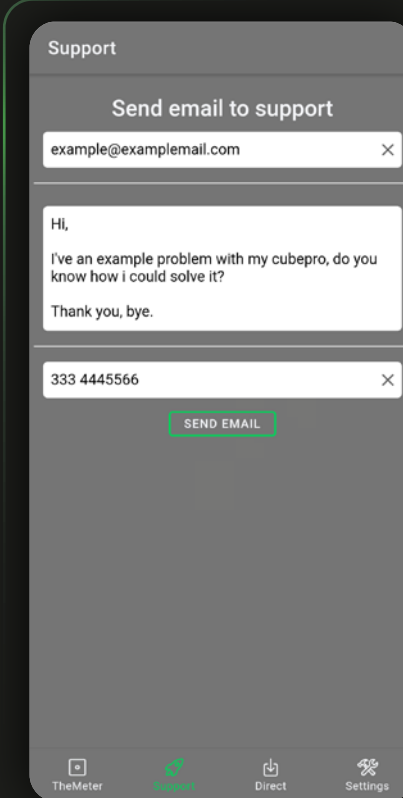

3. Privacy Policy

2. App version

From the Support  screen you have the possibility to contact THEMETER team by email

2. Enter here your issue

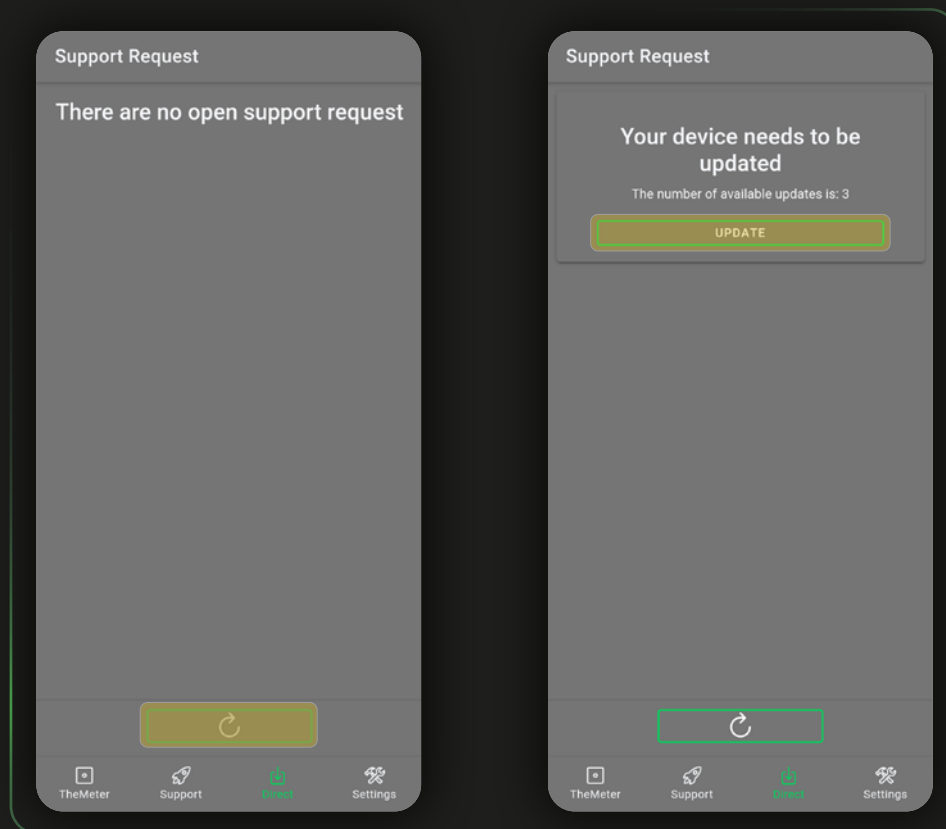

The screenshot shows a mobile app interface for sending support emails. At the top, it says 'Support'. Below that is a section titled 'Send email to support'. There are three input fields: the first contains 'example@exampleemail.com', the second contains a message 'Hi, I've an example problem with my cubepro, do you know how i could solve it? Thank you, bye.', and the third contains '333 4445566'. A green 'SEND EMAIL' button is located below the phone number field. At the bottom of the screen, there is a navigation bar with four icons: 'TheMeter', 'Support', 'Direct', and 'Settings'.

1. Enter your email address

3. Enter your phone number

The response will always be delivered by e-mail directly into your e-mail inbox (may end up in the SPAM folder)

In case of procedures or updates specifically created for solving your support request, they will be sent from THEMETER team in the Direct screen 

To find the special updates you will need to upload the page via  and once they're ready start them by clicking on
